SKILLS

JavaScript, React, Redux, HTML, CSS, Ruby, Ruby on Rails, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, jQuery

---

PROJECTS

BOOM   *-a clone of SoundCloud*   live | github

Rails, ReactJS, Redux, JavaScript, Ruby, Ajax, JQuery, Webpack, PostgreSQL, AWS, Webpack, Git, Heroku
- Integrated Redux with HTML5 media web components to create customized music player with real-time duration updates, responsive real-time scrubbing, play/pause and previous and next track features.
- Built modals for CRUD actions for user auth, tracks, comments, likes and follows to enhance user experience.
- Implemented Amazon Web Services S3 (AWS) for high quality images and audio.

TASTE   *-a restaurant reviewing app*   live | github

Google Places API, MongoDB, ReactJS, Redux, Mongoose, Axios, Node.js, Express, Passport, Validator, Body-parser, Git, Heroku
- Employed Google Places API for accurate real-time restaurant information to enhance user experience..
- Incorporated custom client-side form validations to avoid unnecessary Axios requests overall improving performance.

soundSpace *-a game to create a soundscape*   live | github

Vanilla JavaScript
- Solely used HTML5 and Vanilla JavaScript to create a user interactive game.
- Implemented game logic, algorithms, custom audio and event listeners to enhance playability and user experience.

EXPERIENCE
